

## LABORATORY HEMOSTASIS

A new book edited by George M. Rodgers, Christopher M. Lehman, and Sterling T. Bennett.

There are many hemostasis and thrombosis texts that serve as general reference for the basic science and clinical aspects of hemostasis. Missing amongst the libraries of hemostasis texts is a single reference text that provides practical information and guidance on the topics relevant to directing a coagulation laboratory. *Laboratory Hemostasis*, edited by George M. Rodgers, Christopher M. Lehman, and Sterling T. Bennett and published by Springer, does just that.

A variety of persons will find this text useful, including residents and fellows training to become laboratory directors or those just learning the basics of coagulation testing and studying for board examinations; pathologists, clinical laboratory scientists, and other physicians serving as laboratory directors; coagulation laboratory supervisors, technologists, and technicians looking for a day-to-day reference of laboratory operation; and, finally, clinicians looking to understand the role of the coagulation laboratory in patient evaluation and monitoring.

*Laboratory Hemostasis*  
is a single reference text that provides practical  
information and guidance on topics relevant to  
directing a coagulation laboratory.

### CHAPTER Listing

- |   |  |
|---|--|
| 1. Role and Responsibilities of the Laboratory Director       | 6. Testing for Inherited Bleeding Disorders                |
| 2. Collection of Coagulation Specimens                        | 7. Testing for Acquired Platelet Disorders                 |
| 3. Instrumentation for the Coagulation Laboratory             | 8. Acquired Coagulation Disorders and TTP                  |
| 4. Validation of Coagulation Assays, Instruments and Reagents | 9. Testing for Inherited and Acquired Thrombotic Disorders |
| 5. Hemostasis Screening Assays                                | 10. Monitoring Anticoagulant Therapy                       |
|   | 11. Coagulation Testing and Transfusion Medicine           |

## Editors

**George M. Rodgers III, M.D., Ph.D.**  
Medical Director, Hemostasis and  
Thrombosis Laboratory

Dr. Rodgers is the medical director of the Hemostasis and Thrombosis Laboratory at ARUP. He is a professor of medicine and pathology at the University of Utah School of Medicine. Dr. Rodgers received his Ph.D. in pharmacology and his M.D. from the Tulane University School of Medicine. He is certified in

internal medicine by the American Board of Internal Medicine and in hematology by the American Board of Pathology. Dr. Rodgers is the co-editor of *Wintrobe's Clinical Hematology*.

**Christopher M. Lehman, M.D.**  
Co-Medical Director, University  
Hospitals and Clinics Clinical Laboratory

Dr. Lehman is the co-medical director of the University Hospitals and Clinics Clinical Laboratory, Phlebotomy and Support Services, and Transfusion Services. He is an associate professor of pathology at the University of Utah School of Medicine. Dr. Lehman received his M.D. from the University of

Utah and is board certified in clinical pathology, blood banking, and transfusion medicine by the American Board of Pathology. In addition to other memberships, Dr. Lehman is a member of the American Association of Blood Banks.

**Sterling T. Bennett, M.D.**  
Medical Director and CEO, Intermountain  
Healthcare Central Laboratory

Dr. Bennett is the medical director and CEO of Intermountain Healthcare Central Laboratory. He is a volunteer adjunct associate professor of pathology at the University of Utah School of Medicine, and has been a member of Utah Pathology Services since 1992. Dr. Bennett received his B.S. in

mathematics and his M.D. from the University of Utah. He completed his residency in clinical pathology and fellowships in blood banking and medical informatics at the University of Minnesota where he also received his M.S. in health informatics.
