 Disclaimer: Specimens for elemental testing should be collected in certified metal-free containers. Elevated results for elemental testing may be caused by environmental contamination at the time of specimen collection and should be interpreted accordingly. It is recommended that unexpected elevated results be verified by testing another specimen.
 06-Jun-17 13:44:00 Specific Gravity Confirmation, Urine:
 Urine
 Physiologic range: 1.010 - 1.030.
 Samples with specific gravity lower than 1.010 are too dilute and should be recollected.
 Analysis by Refractometer (REF)
