06-Jun-18 18:56:00 Occult Blood, Fecal Immunoassay Interp:
 INTERPRETIVE INFORMATION: Fecal Occult Blood by Immunoassay

No single cutoff provides superior colorectal cancer detection rates. The test manufacturer recommends the use of a 100 ng/mL cutoff that produces a specificity of approximately 95 percent for the detection of lower gastrointestinal bleeding. This test does not detect upper gastrointestinal bleeding.
