11-Jun-20 09:52:00 HLA Class I Antibody,HLA Antibody Screen Interpretation,HLA Class II Antibody:
 Performed at: UUHC: Histocompatibility and Immunogenetics, 417 Wakara Way, Ste. 3220, SLC, UT 84108

11-Jun-20 09:52:00 HLA Antibody Screen Interpretation:
 INTERPRETIVE INFORMATION: HLA Antibody Screen Class I and Class II

Purpose: To detect HLA Class I and Class II IgG antibodies.

Analytical Sensitivity & Specificity: More sensitive than traditional lymphocyte cytotoxicity procedures.

Limitations: Only detects IgG antibody isotype; IgM antibodies are not detected. This test does not provide information on the specificities of HLA antibodies detected.

Test Results: Results are reported as positive or negative for HLA Class I and Class II antibodies.

Test systems were developed and their performance characteristics determined by the H&I laboratory at the University of Utah Health, under the accreditation guidelines from the American Society for Histocompatibility and Immunogenetics (ASHI). Some tests or reagents have not been cleared or approved by the FDA.
