f1: Immunoglobulin G Subclass 4

ARUP has validated a new assay for measuring IgG subclasses and reference intervals have changed for Pediatric patients. If the patient is being monitored to determine a treatment response, and the prior sample was tested up to 30 days prior to 02/16/2021, ARUP will offer re-baselining free of charge. If this is an initial IgG subclass result for diagnosis, re-baselining is not needed.
