Keppra (Levetiracetam)	Received: 01-Dec-21 16:31	Report/Verified: 01-Dec-21 16:55	
Procedure	Result	Units	Reference Interval
Keppra (Levetiracetam)	41 ^H ⁱ¹	ug/mL	10-40

Test Information

il: Keppra (Levetiracetam)
INTERPRETIVE INFORMATION: Keppra (Levetiracetam)

Therapeutic Range: 10-40 ug/mL
Toxic: Not well Established

Pharmacokinetics of levetiracetam are affected by renal function. Adverse effects may include somnolence, weakness, headache and vomiting.

This levetiracetam (Keppra) immunoassay uses the ARK Diagnostics reagents, which has known cross-reactivity with the drug brivaracetam (Briviact) and may report inaccurate results. Patients transitioning from levetiracetam to brivaracetam or those who are using both medications should not monitor drug concentrations with the ARK Diagnostics assay. These patients should be monitored using a validated chromatographic methodology that distinguishes between drugs to determine drug concentrations.
