Jonathan R. Genzen, MD, PhD, Chief Medical Officer

Patient Age/Sex: 46 years Male

Specimen Collected: 19-Dec-22 16:53

EBV by Quantitative NAAT, Plasma		Received: 19-Dec-22 16:54	Report/Verified: 19-Dec-22 16:58
Procedure	Result	Units	Reference Interval
EBV Qnt by NAAT, Plasma IU/mL	12,000	IU/mL	
EBV Qnt by NAAT, Plasma log IU/mL	4.08	log IU/mL	
EBV Qnt by NAAT, Plasma Interp	Detected * i1		[Not Detected]

Test Information

i1: EBV Qnt by NAAT, Plasma Interp
 INTERPRETIVE INFORMATION: EBV Qnt by NAAT, Plasma Interp

The quantitative range of this test is 1.54 - 8.00 log IU/mL (35.0 - 100,000,000 IU/mL) .

An interpretation of "Not Detected" does not rule out the presence of inhibitors or EBV DNA concentration below the level of detection of the assay. Care should be taken in the interpretation of any single viral load determination.

International standardization has improved comparability of assay results across laboratories, but discrepancies still exist due to commutability issues with the standard.
