

Patient Age/Sex: Female

Specimen Collected: 11/19/2024 14:41 MST

Francisella tularensis Ab IgG/IgM | Received: 11/19/2024 14:41 MST Report/Verified: 11/19/2024 14:42 MST

Procedure	Result	Units	Reference Interval
F tularensis Antibody,IgG	Positive *		[Negative]
F tularensis Antibody,IgM	Positive *		[Negative]
F.tularensis Antibody Interpretation	See Note <sup>t1 i1</sup>		

Interpretive Text

t1: 11/19/2024 14:41 MST (F. tularensis Antibody Interpretation)  
Presence of IgG and IgM antibodies to Francisella tularensis detected, suggestive of recent infection.

Test Information

i1: F. tularensis Antibody Interpretation  
INTERPRETIVE INFORMATION: F. tularensis Antibody Interpretation  
Cross-reactivity with Brucella and Yersinia antibodies may occur. False-positive results are possible, therefore results should be interpreted with caution and correlated with clinical information. Confirmation by another method, such as agglutination may be helpful.  
This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. This test was performed in a CLIA-certified laboratory and is intended for clinical purposes.
