

Patient Age/Sex: 10 years Female

Specimen Collected: 5/9/2025 09:28 MDT			
Lead, Whole Blood (Venous)	Received: 5/9/2025 09:28 MDT		Report/Verified: 5/9/2025 09:29 MDT
Procedure	Result	Units	Reference Interval
Lead, Whole Blood (Venous)	3.5 # i1	ug/dL	[<=3.4]

Test Information

i1: Lead, Whole Blood (Venous)
INTERPRETIVE INFORMATION: Lead, Whole Blood (Venous)

Reference intervals are based on the CDC's Blood Lead Reference Value (BLRV). Thresholds and time intervals for retesting, medical evaluation, and response vary by state and regulatory body. Contact your State Department of Health and/or applicable regulatory agency for specific guidance on medical management recommendations.

Elevated results may be due to skin- or collection-related contamination, including the use of tubes that are not certified to be trace element-free. If an elevated result is suspected to be due to contamination, confirmation with a second specimen collected in a certified trace element-free tube is recommended.

Methodology: Inductively Coupled Plasma-Mass Spectrometry (ICP-MS).

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. This test was performed in a CLIA-certified laboratory and is intended for clinical purposes.
