Copper, Serum/Plasma	200.0 H	ug/dL	[70.0-140.0]	19-071-900141	12-Mar-19 12:39:00	12-Mar-19 12:39:00	12-Mar-19 12:42:25

12-Mar-19 12:39:00 Copper, Serum/Plasma:
 INTERPRETIVE INFORMATION: Copper, Serum or Plasma

Elevated results may be due to skin or collection-related contamination, including the use of a noncertified metal-free collection/transport tube. If contamination concerns exist due to elevated levels of serum/plasma copper, confirmation with a second specimen collected in a certified metal-free tube is recommended.

Serum copper may be elevated with infection, inflammation, stress, and copper supplementation. In females, elevated copper may also be caused by oral contraceptives and pregnancy (concentrations may be elevated up to 3 times normal during the third trimester).

Test developed and characteristics determined by ARUP Laboratories. See Compliance Statement B: aruplab.com/CS
