12-Sep-18 10:10:00 HBV Qnt by NAAT Interp: INTERPRETIVE INFORMATION: HBV by Quantitative NAAT

Normal range for this assay is "Not Detected". The quantitative range of this assay is $1.00-9.00 \log IU/mL (10-1,000,000,000 IU/mL)$.

An interpretation of "Not Detected" does not rule out the presence of inhibitors in the patient specimen or HBV DNA concentration below the level of detection of the test. Care should be taken when interpreting any single viral load determination.

This assay should not be used for blood donor screening, associated re-entry protocols, or for screening Human Cell, Tissues and Cellular Tissue-Based Products (HCT/P).

* Abnormal, # = Corrected, C = Critical, f = Footnote, H = High, L = Low, t = Interpretive Text, @ = Reference Lab
