Neuron Specific Enolase in CSF Procedure	Result	Units	Reference Interval
Neuron Specific Enolase_CSF	>10000.0 ^{H f1 i1}	ng/mL	<=27.3

Result Footnote

f1: Neuron Specific Enolase_CSF

Beginning on November 15, 2021, ARUP will change its Neuron Specific Enolase ELISA method for a Neuron Specific Enolase(NSE) Thermo Scientific BRAHMS KRYPTOR immunoassay method. To help establish a new baseline for patients, results of the new Kryptor method are charted in the result field for this order, while results from the ELISA assay (tested in parallel for this specimen) are reported in the comment below.

The ARUP NSE ELISA result is _ ng/mL.

The reference interval for the NSE CSF BRAHMS KRYPTOR method is less than or equal to 27.3 ng/mL.

The reference interval for the ARUP NSE CSF ELISA method is 1.0-7.0 ug/L.

Test Information

i1: Neuron Specific Enolase_CSF

INTERPRETIVE INFORMATION: Neuron Specific Enolase_CSF

This assay is performed using the BRAHMS NSE Kryptor Immunoassay. Results obtained with different assay methods or kits cannot be used interchangeably. Results cannot be interpreted as absolute evidence of the presence or absence of malignant disease.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
