Jonathan R. Genzen, MD, PhD, Chief Medical Officer

Patient Age/Sex:

Male

**Specimen Collected: 12-Sep-22 15:07**

Procedure	Result	Units	Reference Interval
CMV Qnt by NAAT, Plasma IU/mL	10,000	IU/mL	
CMV Qnt by NAAT, Plasma log IU/mL	4.00	log IU/mL	
CMV Qnt by NAAT, Plasma Interp	<b>Detected * i1</b>		

**Test Information**

i1: CMV Qnt by NAAT, Plasma Interp

INTERPRETIVE INFORMATION: CMV by Quantitative NAAT, Plasma

The quantitative range of this test is 1.54 - 7.00 log IU/mL (34.5 - 10,000,000 IU/mL).

An interpretation of "Not Detected" does not rule out the presence of inhibitors or CMV DNA concentration below the level of detection of the assay. Care should be taken in the interpretation of any single viral load determination.

International standardization has improved comparability of assay results across laboratories, but discrepancies still exist due to commutability issues with the standard.

\*=Abnormal, #=Corrected, C=Critical, f=Result Footnote, H=High, i=Test Information, L=Low, t=Interpretive Text, @=Performing lab

**Unless otherwise indicated, testing performed at:****ARUP Laboratories**
