MEDICARE COVERAGE OF LABORATORY TESTING

Please remember when ordering laboratory tests that are billed to Medicare/Medicaid or other federally funded programs, the following requirements apply:

1. Only tests that are medically necessary for the diagnosis or treatment of the patient should be ordered. Medicare does not pay for screening tests except for certain specifically approved procedures and may not pay for non-FDA approved tests or those tests considered experimental.
2. If there is reason to believe that Medicare will not pay for a test, the patient should be informed. The patient should then sign an Advance Beneficiary Notice (ABN) to indicate that he or she is responsible for the cost of the test if Medicare denies payment.
3. The ordering physician must provide an ICD-10 diagnosis code or narrative description, if required by the fiscal intermediary or carrier.
4. Organ- or disease-related panels should be billed only when all components of the panel are medically necessary.
5. Both ARUP- and client-customized panels should be billed to Medicare only when every component of the customized panel is medically necessary.
6. Medicare National Limitation Amounts for CPT codes are available through the Centers for Medicare & Medicaid Services (CMS) or its intermediaries. Medicaid reimbursement will be equal to or less than the amount of Medicare reimbursement.

The CPT Code(s) for test(s) profiled in this bulletin are for informational purposes only. The codes reflect our interpretation of CPT coding requirements, based upon AMA guidelines published annually. CPT codes are provided only as guidance to assist you in billing. ARUP strongly recommends that clients reconfirm CPT code information with their local intermediary or carrier. CPT coding is the sole responsibility of the billing party.

The regulations described above are only guidelines. Additional procedures may be required by your fiscal intermediary or carrier.

### Childhood-Onset Epilepsy Panel, Sequencing and Deletion/Duplication

**CPT Code(s):** 81189; 81404; 81405; 81406; 81407

### Coecidioides Antigen Quantitative by EIA

**Specimen Required:** Collect: Plain Red, Serum Separator Tube (SST), Lavender (K$_2$ or K$_3$EDTA), Pink (K$_3$EDTA), Green (Sodium or Lithium Heparin), or Light Blue (CTAD). Also acceptable: Urine, CSF, or BAL.

**Specimen Preparation:** Transfer 2 mL serum or plasma to an ARUP Standard Transport Tube. (Min: 1.2 mL)
Transfer 1 mL urine or BAL to an ARUP Standard Transport Tube. (Min: 0.5 mL)
Transfer 1 mL CSF to an ARUP Standard Transport Tube. (Min: 0.8 mL)

**Storage/Transport Temperature:** Refrigerated. Also acceptable: Room temperature or frozen.

**Remarks:** Specimen source required.

**Stability (collection to initiation of testing):** Ambient: 2 weeks; Refrigerated: 2 weeks; Frozen: Indefinitely

### Infantile Epilepsy Panel, Sequence Analysis and Exon-Level Deletion/Duplication

**CPT Code(s):** 81404; 81405; 81406; 81407; 81185

### LSD, Urine - Screen with Reflex to Confirmation/Quantitation

**Performed:** Varies

**Reported:** 8-18 days

**Specimen Required:** Collect: Urine.

**Specimen Preparation:** Transfer 2 mL urine to an ARUP Standard Transport Tube. (Min: 0.85 mL)

**Storage/Transport Temperature:** Refrigerated. Also acceptable: Frozen.

**Unacceptable Conditions:** Specimens submitted in glass containers.

**Stability (collection to initiation of testing):** Ambient: 24 hours; Refrigerated: 1 month; Frozen: 1 month

### Prostate-Specific Kallikrein, 4Kscore

**HOTLINE NOTE:** There is a component change associated with this test.
