

## Not your average credit monitoring

Nearly a third of all  
identity cases take  
more than a year to  
discover

### Benefits of PrivacyArmor

#### Auto-on monitoring

Unlike traditional identity protection services, PrivacyArmor starts working as soon as we receive a participant's Social Security number.

#### Rapid alerting

InfoArmor is proud to provide alerts in near real-time, helping participants catch identity theft as soon as it occurs.

#### Committed to privacy

Unlike free credit monitoring services, we don't sell your personal data or use it to serve you ads.

#### Access to credit report and score(s)

PrivacyArmor provides annual credit reports and monthly scores from TransUnion — the only credit bureau who hasn't suffered a breach. And coming in 2019, PrivacyArmor Plus will come with unlimited scores and reports from TransUnion and annual reports and scores from all three bureaus.

#### Pre-existing condition resolution

If a participant has a pre-existing identity theft issue, we will honor the full benefits of membership at no additional cost.

#### Highly trained and certified Privacy Advocates available 24/7

Our U.S.-based Privacy Advocates are trained and certified to handle and remediate every type of identity fraud case, and they're available 24/7.

Identity theft happens in seconds, yet traditional credit monitoring services can take days to alert you of questionable activity.

At InfoArmor, we send notifications to participants in near real-time — and we don't just rely on the big credit bureaus for our information.

Our team of human operatives scours the dark web with one goal in mind: to alert our participants to exposed information before it can be used fraudulently.
