# Stop Searching
and Start Saving

Laboratory results play a crucial role in clinical decision making, but a recent survey shows that 69% of physicians order unnecessary tests at least once a week. This adds up to millions of dollars in unnecessary costs for the hospital and the patient.

AnalyticsDx™ is the solution to finding, correcting, and preventing these unnecessary expenses.

AnalyticsDx™ Sendout gives you access to all your testing sent to ARUP, along with metrics like turnaround time, spend, insourcing opportunities, and more.

AnalyticsDx™ Comprehensive brings your inpatient, outpatient, and referral testing data into a cohesive, HIPAA-compliant dashboard that highlights the information you need to reduce costs and improve quality.
