

Next Generation Sequencing

As an academic reference laboratory with 40 years of proven experience, ARUP Laboratories delivers quality genetic testing that you can always trust.

ARUP'S EXTENSIVE MENU OF NEXT GENERATION SEQUENCING (NGS) ASSAYS INCLUDES TESTING FOR:

Hereditary cancer

Cardiovascular disease

Metabolic disorders

Neurologic disease

STABILITY AND SUSTAINABLE GROWTH

We plan for sustainable growth and longevity by engaging in sound, time-tested business practices that prioritize patient care.

UNMATCHED QUALITY

- Our test menu is carefully curated by medical directors based on the latest research and guidelines to maximize the clinical relevance of our test offerings.
- Clinical variant scientists and genetic counselors perform variant interpretation to provide the most actionable information.
- Rigorous quality standards ensure accurate, reliable results.

COMPETITIVE, RELIABLE TURNAROUND TIMES

- We deliver results on time.
- Next generation sequencing: 10–15 days
- Genomic microarray: 10–14 days

SIMPLIFIED WORKFLOWS

- Our seamless integration with electronic medical records streamlines your lab workflow.
- Our extensive menu allows you to consolidate referral testing at one laboratory.
