

ARUP Precision Medicine

The right test for the right patient at the right time.

As an academic enterprise of the University of Utah and its Department of Pathology, ARUP's focus is the patient. ARUP has more than 90 medical experts available for client consultation. Our comprehensive utilization management program empowers our clients to manage healthcare costs without compromising patient care. ARUP continues to be among one of the leaders in precision medicine by providing cutting-edge research and a comprehensive laboratory testing menu using state-of-the-art technologies.

ARUP provides testing to support precision medicine in:

- Addiction management
- Carrier testing
- Diagnostics
- Disease monitoring
- Monoclonal Antibody Therapeutics Monitoring
- Non-invasive testing
- Pain management
- Pharmacogenetics
- Predictive medicine
- Targeted cancer therapies
- Therapeutic drug monitoring
