

Personalize Your Patients' Care

Medicine is not one-size-fits-all. Prescribe patients the right drug and the right dose the first time. Let ARUP help you develop a precision medicine program that works for you and your patients.

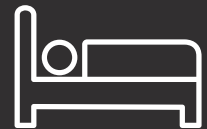

Better predict the efficacy of a drug.

Determine if a patient has nonstandard dose requirements.

Perform less monitoring and make fewer dose adjustments.

Prevent adverse drug events and readmissions.

ARUP LABORATORIES

A nonprofit enterprise of the University of Utah and its Department of Pathology

Don't wait. Contact your ARUP account executive today and schedule a consultation.
