

## **Rapid Mendelian Genes Sequencing Panel, Trio** (2012849)

---

Diagnosing underlying genetic disorders in critically ill infants. For over two years, ARUP has helped local clients find answers for critically ill neonates. Now, we're expanding our help nationwide, impacting and improving the medical management of our tiniest patients. The Rapid Mendelian Genes Sequencing Panel includes parental controls and looks at over 4500 genes by massively parallel sequencing.
