

TEST HIGHLIGHT

Detect **gabapentin** in umbilical cord tissue to guide the best care for newborns.

ARUP[®] LABORATORIES

[www.aruplab.com/
newborn-drug-testing](http://www.aruplab.com/newborn-drug-testing)

ARUP is the only lab offering umbilical cord tissue testing for **gabapentin**.

Why cord tissue over meconium?

Waiting for the first stool to pass may waste valuable time while the baby experiences withdrawal symptoms. Additionally, it can be disposed of secretly, the sample could be too small for testing, or it may pass during a difficult delivery.
