

Analyzing Test Ordering Patterns™ (ATOP®) Report

Helping clients give their data a purpose.

The Challenge

Finding the right tools, resources, and expertise to make your data useful.

Every patient encounter creates a data point from which a provider or organization can gain insight.

With so much raw data, it can be difficult for organizations to access, organize, interpret, and distribute meaningful information to end users.

Standard industry reports seem like a simple solution, but these often inhibit a system's ability to drill down into the data.

The Solution

A custom report providing actionable recommendations.

ARUP's ATOP Report has a new look and provides more customized opportunities.

We don't provide a one-size-fits-all report. Instead, we customize each report to provide our clients with unique and relevant recommendations.

ARUP's experts interpret your data using your AnalyticsDx™ dashboard, leading to improved patient care and potential savings.

Features

Find your organization's best opportunities.

CUSTOMIZED
Opportunities identified are specific to your healthcare organization or hospital.

UTILIZES ARUP ANALYTICSDX
Access to real-time, visual information allows our experts to filter your data, pinpoint interventions unique to your organization, and track implementation over time.

REVIEWED BY INDUSTRY EXPERTS
ARUP's expertise and fluency in diagnostic testing ensures our recommendations are the best solution for your organization.

VETTED INDUSTRY STANDARDS
All of our recommendations are supported by up-to-date industry best practices and guidelines.

Turn data into better outcomes

Patient visits hospital

Tests are ordered

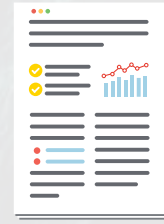

Data is gathered and stored in ARUP AnalyticsDx

ARUP experts review the data, find opportunities

Insights gained empower your organization

Recommendations reported in ATOP

Q&A

Do you need an ATOP Report?

- How often are you reviewing your laboratory testing utilization?
- What resources have you allocated for data analyses?
- Do you have a way to view and interpret your data?
- Do you have a way to request customized reports?
- Are you able to quantify opportunities and track interventions?

NOTES

About Us

ARUP Laboratories is a nonprofit national clinical and anatomic pathology reference laboratory and an enterprise of the University of Utah and its Department of Pathology.

We steadfastly continue to improve processes to ensure consistent, confident solutions. Our endeavor to intelligently innovate allows us to push the boundaries of industry standards and offer what other labs cannot—optimized outcomes for the patient.

Our passionate and dedicated workforce believes in collaborating, sharing knowledge, and contributing to laboratory science in ways that provide the best value for the patient—it's why we exist; why we care; why we are an academic, nonprofit institution.
