

ARUP AnalyticsDx™

How ARUP is helping healthcare organizations navigate their data.

The Challenge

Healthcare data is necessary, but underutilized.

Extracting, analyzing, and interpreting healthcare data on a day-to-day basis is difficult. When multiple systems are storing that data, it's nearly impossible to get the full picture.

Visualizing that data once it's been extracted is important for insight into organizational operations and outcomes.

The Solution

One cohesive tool for real-time healthcare data.

AnalyticsDx offers clients a unified tool that replaces multiple, discordant systems and allows you to use the data you have.

Easy-to-understand visuals and reports make that data useful, allowing clients to implement interventions that create better outcomes for their organization and, ultimately, their patients.

Features

Visual data that embodies your organization.

DYNAMIC, CUSTOMIZED REPORTS

Tailor the data to meet your needs—no templates, no canned reports.

BENCHMARKING

Gauge test utilization by facility or at the provider level to determine outliers.

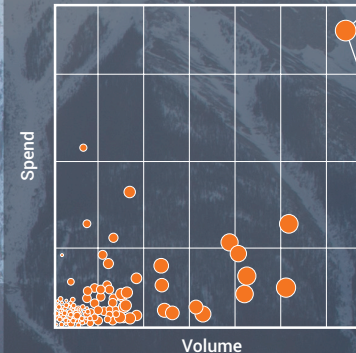

FOCUS

Explore and visualize your clinical, financial, and quality healthcare data.

TARGET AND MONITOR

Recognize when interventions are effective by tracking trends over time.

your data

ARUP Test Name: Quantiferon-TB Gold in Tube
CPT Code(s): 86480
ARUP UM Topic: FDA-Approved Tests
Volume: 6,404
Spend: \$319,452
Common Opportunity: No

Test Code	Volume	Spend
3000399	6,404	\$319,452
2005096	5,125	\$98,260
0080111	5,450	\$15,734
0080389	4,255	\$15,629
0080521	4,232	\$10,232

“The laboratory drives the results of everything else in healthcare.”

—Andrew Fletcher, MD, CPE
Medical Director, Consultative Services

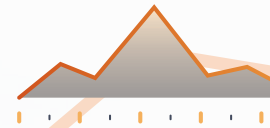

Choose your level of tracking

66

Business Analytics

Provides key **operational** metrics and year-over-year trends

- TAT
- Excepts
- Variances
- Year/year trends

Utilization Management

Allows you to view real-time test utilization data for your **reference** testing

- Provider ordering
- Organizational spend
- Trends over time
- Benchmarks (facility and physician)

Comprehensive Utilization *(in development)*

Track **in-house and reference** testing

- Everything from the UM Dashboard plus
 - » Inpatient and outpatient
 - » DRG breakdown
 - » Key performance indicators (KPI)

Q&A

Does your organization need AnalyticsDx?

- Are you utilizing your existing data?
- How many systems are you currently using to track data?
- How do you request reports?
- What resources do you have allocated for data mining?

NOTES

About Us

ARUP Laboratories is a nonprofit national clinical and anatomic pathology reference laboratory and an enterprise of the University of Utah and its Department of Pathology.

We steadfastly continue to improve processes to ensure consistent, confident solutions. Our endeavor to intelligently innovate allows us to push the boundaries of industry standards and offer what other labs cannot—optimized outcomes for the patient.

Our passionate and dedicated workforce believes in collaborating, sharing knowledge, and contributing to laboratory science in ways that provide the best value for the patient—it's why we exist; why we care; why we are an academic, nonprofit institution.
