ARUP Turnaround Time Report

Reporting Period: April 2017

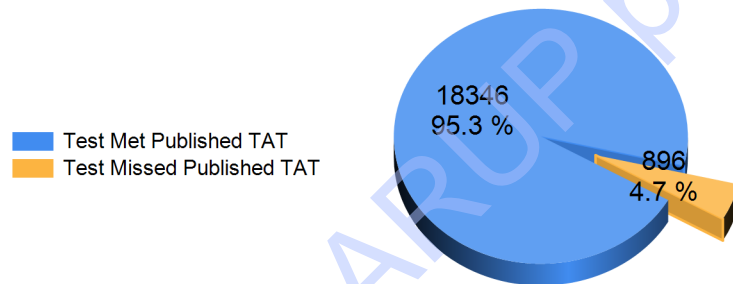

Client ID: [REDACTED]

Purpose: Contains the ARUP Turnaround time information.

Disclaimer: All accession numbers that have been through the exception process, tests that have been cancelled, corrected, or added on by client request after the original order, or Total Time greater than 60 days or less than zero are excluded from this report in order to capture the most accurate turnaround times. Some outliers (e.g. consequences of extended manufacturer back orders) may also be excluded to calculate a more meaningful summary of ARUP turnaround time. Tests that have an ARUP Time of zero (0.0) are not used to calculate the summary turnaround time. ARUP turnaround time is defined as the time from when the samples are processed by ARUP's Specimen Processing department until the time the test is complete.
